

OFFSHORE PROJECTS

WHO WE ARE

SubC Partner is a project oriented offshore company

We provide services across a wide value chain, starting from problem assessment, to solution development and implementation.

Our people bring a wealth of expertise working in project teams, along with our flexible and customer oriented approach, aligned to the values our company is built on: flexibility, credibility and responsibility.

Our business is based around four core divisions capable of delivering small scale to large scale EPCI projects:

Subsea Engineering

- Surface demand diving services
- ROV specialist services
- Application development and testing

Offshore Construction:

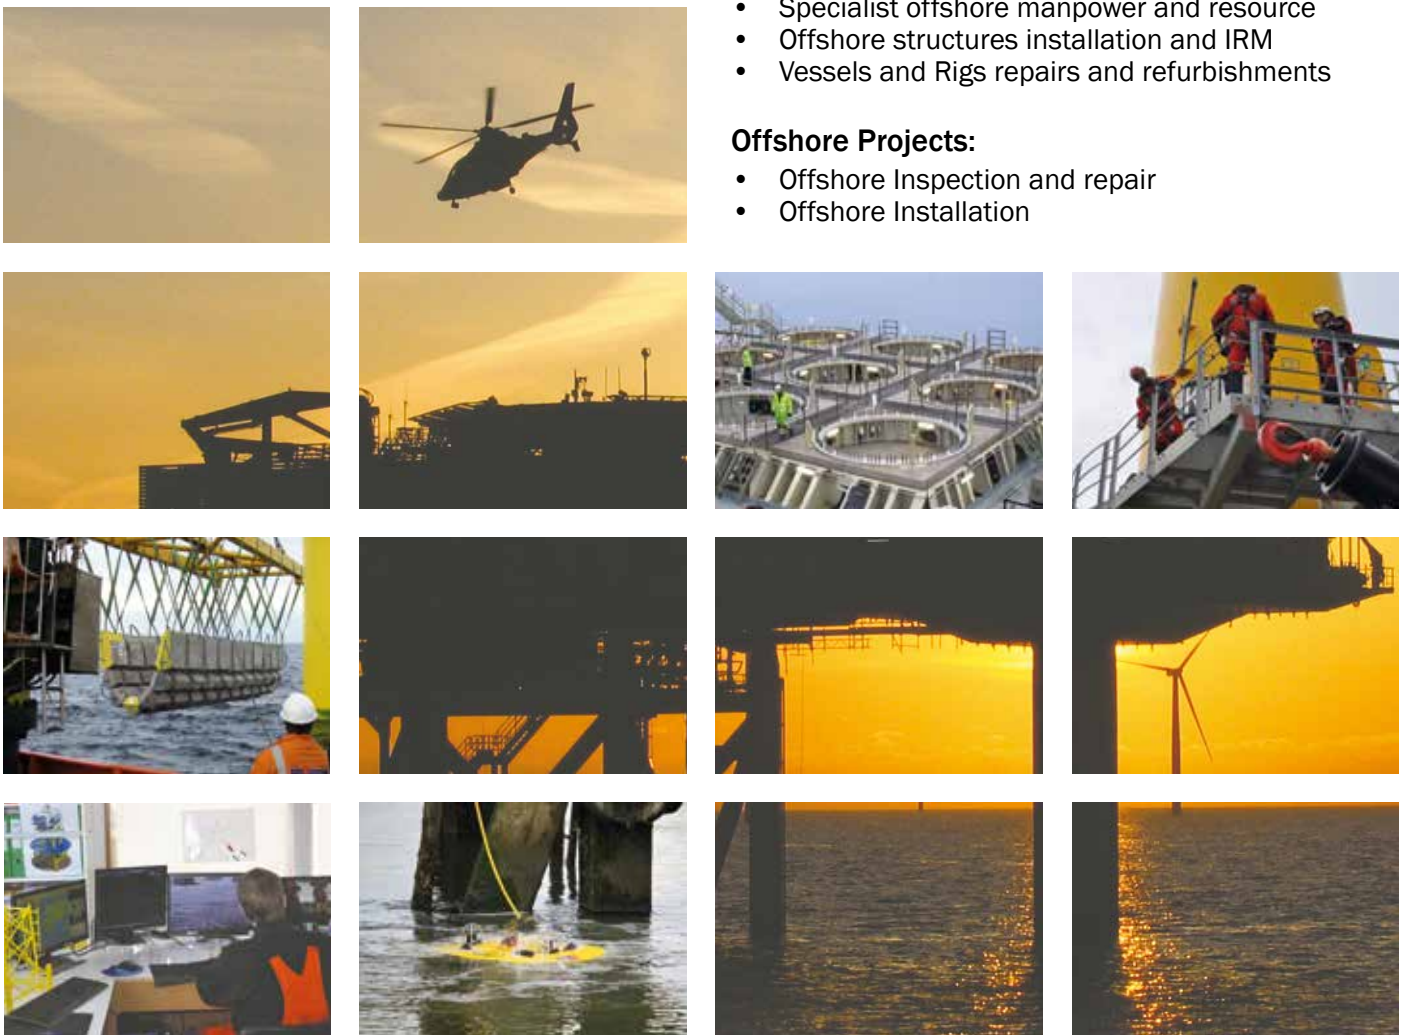

- EPCI projects
- Subsea and Topsides modules - multidiscipline
- Caissons, risers and spool fabrication
- Steel Structures in carbon & stainless steel
- Alu. constructions

Vessel & Site Services:

- Specialist offshore manpower and resource
- Offshore structures installation and IRM
- Vessels and Rigs repairs and refurbishments

Offshore Projects:

- Offshore Inspection and repair
- Offshore Installation

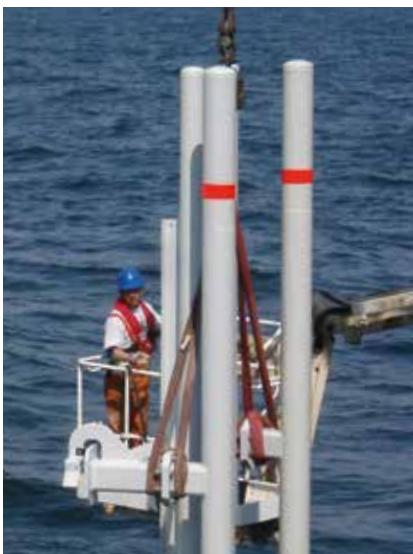

WHERE WE OPERATE

SubC Partner operates across the entire North Sea

We operate from 3 strategic locations:

The headquarters in Denmark and country offices in United Kingdom and Norway.

We have an extensive network that allow us to complement our in-house assets and people to provide a tailor-made and cost-effective one-stop shop solution, regardless of project size, location and complexity.

OUR CUSTOMERS

- ✓ Oil & Gas Exploration & Production operators
- ✓ Offshore Renewable Energy operators
- ✓ Offshore contractors

OFFSHORE IRM

SubC has a considerable experience in the inspection, repair and maintenance from seabed to topside in the offshore industry.

Our experienced teams are able to carry out inspections, repair and maintenance work inside and outside the foundation/transition piece and on jacket structures such as NDT and thickness measurement and inspection using ROV and divers.

If heavy repair work is required on the transition piece, monopole or jacket construction, we can mobilize all necessary trades required for the work to be carried out including any kind of support vessels.

On top site constructions and installations, we can deliver complete solutions for all types of maintenance ranging from large maintenance projects to hiring out manpower. Associated services: project management, subsea engineering, marine services and vessels.

SubC can support the customer in all phases in an IRM project from study to execution and finally the documentation.

The size and complexity of the company allows us for a very high degree of flexibility, thus we are capable of having a very short time frame from the initial contact with the customer to the final close out.

OFFSHORE INSTALLATION

SubC offers multi discipline installation assistance in an innovative and cost effective way. Experienced in the construction and installation phases, we are able to offer hands on assistance from the top side and down to the seabed.

SubC is an experienced service provider to and we are able to deliver turnkey solutions from initiating studies to final handover.

We provide highly efficient and contemporary solutions for your project needs and have the resources to carry out all works with our multidisciplinary team of project managers, engineers and manpower.

- Feasibility Study
- Inspection / survey
- Engineering and design
- 3rd part approval
- Project management
- Subsea activities
- Construction
- Risk analyses
- Hook up / installation
- MC / commissioning
- Handover
