

## **About SubC Partner**

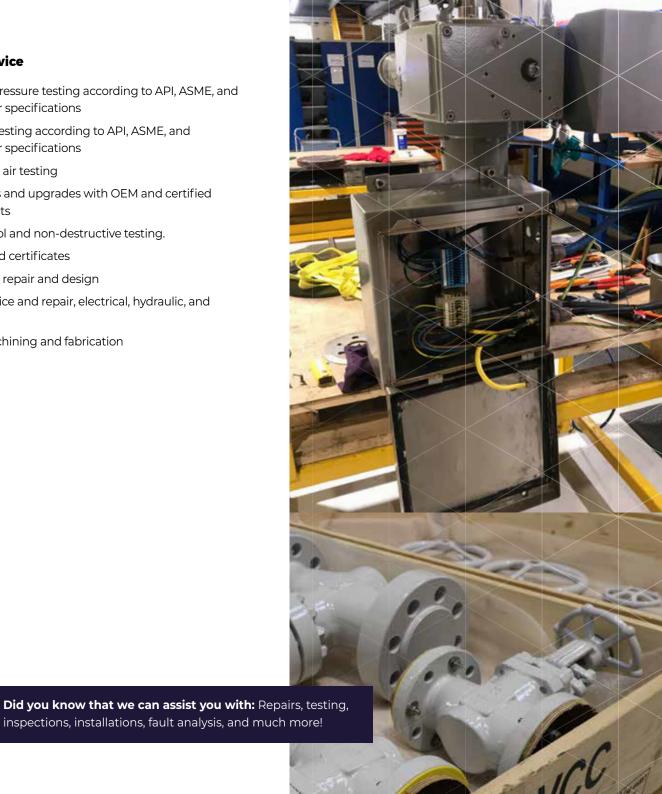

SubC Partner is an international provider of services and products to various industries, with a clear focus on delivering integrity solutions tailored to the specific needs of our clients. Our mission is to offer the most innovative, flexible, and cost-effective solutions to drive down energy prices and minimize local environment impact.

We place great importance on partnerships and strong relationships with our clients, business partners, and stakeholders.

We believe in creating cost-effective, tailored solutions that meet individual needs. With a high level of expertise and an innovative profile, we have established a proven track record and a solid foundation for our international growth strategy within the green transition.

## **Workshop service**

- ▶ Hydrostatic pressure testing according to API, ASME, and manufacturer specifications
- ▶ N2 pressure testing according to API, ASME, and manufacturer specifications
- Low-pressure air testing
- Modifications and upgrades with OEM and certified non-OEM parts
- Quality control and non-destructive testing.
- Reporting and certificates
- Control panel repair and design
- Actuator service and repair, electrical, hydraulic, and pneumatic
- In-house machining and fabrication

## **Valve Service and Support**

SubC advises and provides service and support for valves, actuators, control panels, and support equipment. We use original parts from the manufacturer and can manufacture new ones, in cases where they are no longer available. This resolves issues quickly and reduces downtime.

- Actuated valves
- Isolation valves
- Choke valves
- Control valves
- ► Pressure Safety valves
- ► Instrumentation valves
- Check valves
- Double block and bleed valves
- Needle valves
- ► Actuators (Hydraulic, Electric, and Pneumatic)
- Double-acting and spring return
- ► Linear and quarter turn
- Control panels (Hydraulic and Pneumatic)
- Positioners
- ► Technical support 24/7
- Valve management and inventory
